

Advance-Nilfisk Part

Advance-Nilfisk Part - Think about how tedious it would actually be to clean up your very own house right after throwing a big party, without help from cleaning equipment. In the past, when carpets and upholstery had the dirt beat out of them manually; brushes, brooms and cleaning cloths were the leading cleaning supplies of that time.

P.A. Fisker, the man who founded Nilfisk-Advance, was an electrical engineer who loved working with electrical motors. Establishing the company in 1906, he began to produce motors so as to drive fans, machine tools, coffee grinders and drills. Mr. Fisker's dream from the start was to have an international business selling merchandise worldwide.

The Nilfisk C1 was an incredible breakthrough for the cleaning industry. This ground breaking vacuum cleaner, invented by Mr. Fisker, weighed only 17.5 kilos and could be operated by a single individual. This creation came in a time where many cleaning equipment were huge and needed 4 or more operators, thus, the Nilfisk C1 changed everything and evolved the way we clean forever. The brain behind these very first cleaning machines remains unparalleled. Cleaning machines offer an excellent solution to an existing crisis; things get filthy and should be cleaned regularly, without too much effort.

Little by little, the company Nilfisk-Advance expanded throughout the years. During the early 1980's the business grew more rapidly when the company became a part of the NKT Group. With new owners on board, they concentrated on driving Nilfisk-Advance ahead within the trade, trying to be an active worldwide player in making professional cleaning equipment. Nilfisk-Advance is currently located in all parts of the world by steadily obtaining numerous small companies to be able to grow their product range and presence in new markets. They are really proud to provide a variety of cleaning solutions to suit each need.
